

Concrete Floor Grinding Services

WHAT IS CONCRETE GRINDING

Concrete grinding is a process that uses a machine with abrasive diamond tooling to remove material from a concrete surface. We use top-of-the-line concrete grinders to ensure you are getting the best outcome. HSI also offers assessments and insights to correct your concrete problems that leave your floors or walkways looking new.

Concrete grinding can be used for:

- ★ Leveling Uneven Concrete
- ★ Polishing Concrete
- ★ Removing Coatings
- ★ Preparing Surfaces

WHY CHOOSE CONCRETE GRINDING

Concrete grinding can provide an effective tool for your business not only is it a cost effective way to repair or maintain flooring, well below the cost of replacement, concrete grinding also creates a durable and low-maintenance surface making it ideal for high traffic areas. Other benefits of concrete grinding include:

- ★ Improved Traction
- ★ Brighter, Cleaner Floors
- ★ Environmentally Friendly
- ★ Application Versatility

WHAT'S NEXT AFTER GRINDING

After your floors have been ground smooth and polished HSI can add the perfect finishing touches to elevate your space.

- ★ Flooring Replacement
- ★ Concrete Staining
- ★ Stain Protection
- ★ Concrete Hardening & Sealing

Getting a quality concrete flooring is an exacting process, and HSI gives the process the care it deserves. Whether you need your floor leveled, prepped, polished, or replaced HSI's team of certified specialists are well-trained and use the latest techniques and top-of-the-line grinders to ensure your concrete grinding project is as smooth as your floors after they're done.
